PROFESSIONAL PROFILE

Senior Software Engineer with a proven track record of architecting and deploying scalable full-stack applications, multi-tenant SaaS platforms, and cross-platform mobile apps—delivering architectural performance optimizations that reduce API latency by up to 40%. Skilled in React, Next.js, React Native (Expo), TypeScript, Node.js, Express.js, and PostgreSQL. Adept at leading end-to-end product lifecycles—from system architecture and complex live API integrations to modern infrastructure workflows. Strong fit for roles requiring software delivery, product thinking, AI-assisted workflow automation, and scalable, user-focused engineering.

TECHNICAL SKILLS

Front-end: React, Next.js, React Native (Expo), JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Back-end & Databases: Node.js, Express.js, REST API Architecture, PostgreSQL, Neon PostgreSQL, Prisma, SQLite

Testing & Quality Assurance: Jest, Vitest, React Testing Library, Unit Testing, Integration Testing

Mobile & Web: Cross-platform App Development, Progressive Web Apps (PWA), Responsive UI Development

Tools & Deployment: Git, GitHub, GitHub Actions, Vercel, Render, VS Code

Automation & AI: AI Coding Assistants (Cursor, GitHub Copilot), Prompt Engineering, Workflow Automation

PROFESSIONAL EXPERIENCE

Software Engineer

Feb 2026 – Present

[Farmitly Technologies](#)

- Spearheaded the integration of backend APIs into the Farmitly Management Dashboard, migrating codebase from mock structures to live streaming data endpoints while reducing data-loading latency by 40%.
- Resolved complex structural asynchronous race conditions and synchronization state conflicts between frontend and backend architectures, preserving 100% data integrity with zero regressions.

- Developed and maintained cross-platform mobile applications using React Native (Expo) and TypeScript, implementing automated unit tests using Jest to maintain over 85% test coverage.
- Built modular, scalable UI design components and automated asset delivery pipelines, accelerating production feature implementation timelines by 20%.

Software Engineer (Freelance / Contract)

Jan 2026 – Feb 2026

SeaBite Express

- Architected, built, and successfully deployed an end-to-end full-stack business transaction platform from scratch within an aggressive 4-week release window to support immediate field operations.
- Engineered high-throughput relational databases and secure endpoints using Node.js, Express.js, and PostgreSQL to capture operational sales flows, saving administrative staff 10+ manual reporting hours weekly.

SELECTED PROJECTS

Olabits Estate Bot: Developed a multi-tenant real estate AI chatbot SaaS platform using Next.js and Prisma. Designed scalable multi-tenant schemas and integrated secure Paystack APIs to automate user tier logic and subscription cycles.

Olabits Stores: Built and deployed a production-ready, highly reactive full-stack e-commerce solution. Utilized Next.js server components and Neon PostgreSQL to enable lightning-fast server rendering; globally deployed on Vercel infrastructure.

GMT Homes Real Estate Platform: Built a polished Next.js real estate application complete with interactive property rendering, integrated user authentication dashboards, modular listing pipelines, and secure PostgreSQL persistence.

MT5 Multi-Client SaaS Trading Bot: Built an automated trading execution platform with cloud-agnostic multi-client deployment profiles, robust encryption parameters for customer storage layers, and rigorous execution rulesets.

AI Job Hunter Bot: Developed a background operational pipeline tool utilizing GitHub Actions and Resend to monitor job directories, run parsing rankings, and deliver analytics digests directly to inbox infrastructure.

EDUCATION

Software Engineering

GMT Softwares Academy | Sep 2025 – Apr 2026

B.Sc. Physics (Hons)

Federal University Lokoja | 2016 – 2021

LANGUAGES

- English (High Proficiency)
