PROFESSIONAL PROFILE

Software Engineer with a proven track record of architecting and deploying scalable full-stack applications, multi-tenant SaaS platforms, and cross-platform mobile apps. Skilled in React, Next.js, React Native (Expo), TypeScript, Node.js, Express.js, and PostgreSQL. Adept at leading end-to-end product lifecycles-from system architecture and complex API integrations to modern deployment workflows. Strong fit for roles requiring product thinking, AI-assisted workflow automation, and scalable, user-focused engineering solutions.

TECHNICAL SKILLS

Front-end: React, Next.js, React Native (Expo), JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Back-end & Databases: Node.js, Express.js, REST API Architecture, PostgreSQL, Neon PostgreSQL, Prisma, SQLite

Mobile & Web: Cross-platform App Development, Progressive Web Apps (PWA), Responsive UI Development

Tools & Deployment: Git, GitHub, GitHub Actions, Vercel, Render, VS Code

Automation & AI: AI Coding Assistants (Cursor, GitHub Copilot), Prompt Engineering, Workflow Automation

PROFESSIONAL EXPERIENCE

Software Engineer

[Farmitly Technologies](#)

Feb 2026 - Present

- Spearheaded the integration of backend APIs into the Farmitly Management Dashboard, migrating from mock data to live endpoints with robust data persistency.
- Resolved complex state and synchronization conflicts between frontend and backend architectures, ensuring strict UI parity and data integrity.
- Developed and maintained cross-platform mobile applications using React Native (Expo) and TypeScript for market-connection solutions.
- Built scalable UI components and contributed to production-ready workflows to enhance the overall user experience.

PROFESSIONAL EXPERIENCE

Software Engineer

Jan 2026 - Feb 2026

SeaBite Express

- Architected and deployed a full-stack sales and inventory management system used for real business transactions and operational record keeping.
- Engineered backend microservices using Node.js, Express.js, and PostgreSQL to handle complex sales data, inventory flow, and reporting analytics.

SELECTED PROJECTS

Olabits Estate Bot: Engineered a multi-tenant real estate AI chatbot SaaS. Designed robust database schemas, implemented plan enforcement logic, and integrated Paystack for seamless subscription billing workflows.

Olabits Stores: Developed and deployed a high-performance full-stack e-commerce platform. Leveraged Next.js and Neon PostgreSQL for optimized server-side rendering and secure data management; successfully hosted on Vercel.

GMT Homes Real Estate Platform: Built a polished Next.js real estate platform with property browsing, authentication, dashboards, listing submission, map integration, and PostgreSQL-backed cloud storage.

MT5 Multi-Client SaaS Trading Bot: Built an automated trading system with multi-client support, encrypted client storage, risk control, and structured VPS-ready execution workflow.

AI Job Hunter Bot: Built a GitHub Actions and Resend powered automation tool that scans job boards, ranks openings, discovers recruiter emails, and sends daily reports.

EDUCATION

Software Engineering

GMT Softwares Academy | Sep 2025 - Apr 2026

B.Sc. Physics (Hons)

Federal University Lokoja | 2016 - 2021

LANGUAGES

- English (High Proficiency)
