SAMUEL OLAWALE ATILOLA

SENIOR FULL-STACK & MOBILE SOFTWARE ENGINEER

Lagos, Nigeria • +234 803 520 8600 • atilola33@yahoo.com

github.com/Olabits-Dev • LinkedIn • Portfolio

PROFESSIONAL PROFILE

Senior Software Engineer and **Full-Stack Architect** with 4+ years of hands-on experience building and scaling production web, mobile, and cloud platforms using React, Next.js, React Native (Expo), TypeScript, Node.js, and PostgreSQL. Demonstrated track record of designing offline-first mobile synchronization engines with SQLite persistence, deploying multi-tenant SaaS platforms with automated Paystack subscription billing, and implementing production AI systems using the Vercel AI SDK and Google Gemini. Adept at building resilient edge architectures (Next.js 16 App Router BFF), defensive runtime schema adapters (Zod), and automated unit/integration test suites (Vitest, Jest, Cypress) that eliminate regressions and reduce API latency by up to 40%.

TECHNICAL SKILLS

Languages & Core: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3, Tailwind CSS v4

Frontend Frameworks: React 19, Next.js 16 (App Router / BFF Proxy), Vue 3 (Composition API), Vite, Zustand, Pinia

Mobile Engineering: React Native, Expo (SDK 55/56, Expo Router), NativeWind, Capacitor, Android Keystore Signing & AAB Bundles

Backend & Databases: Node.js, Express.js, PostgreSQL, Neon Serverless, Prisma ORM, SQLite, REST API Architecture

Cloud, Messaging & AI: Firebase Cloud Messaging (FCM / Web Push Service Workers), Vercel AI SDK, Google Gemini API, Paystack API, Resend

Testing & QA: Vitest, Jest, Cypress (E2E), React Testing Library, Supertest, Unit & Integration Test Automation

DevOps & Security: Git, GitHub Actions (CI/CD), Docker, Vercel, Render, Zod Schema Validation, Fernet AES Encryption, JWT & RBAC

Architecture & Patterns: Offline-First Mobile Sync, BFF Gateway Pattern, Idempotent Queues, Event Bus Synchronization, Micro-SaaS Design

PROFESSIONAL EXPERIENCE

Farmitly Technologies — Software Engineer (Full-Stack & Mobile) **Feb 2026 – Present**

- **Offline-First Synchronization Engine:** Architected a native local persistence engine using SQLite and background sync queues (offlineBackendSync), enabling seamless operational logging and 100% data integrity across remote poultry farms under intermittent rural connectivity.
- **Feed Traceability & Checksum Scanner:** Engineered a mobile camera barcode/QR scanner with Luhn mod N checksum validation, automating inventory feed stock deduction and eliminating manual reporting discrepancies.
- **Proof-of-Work Field Verification:** Built field-worker verification pipelines combining GPS geofencing, timestamped camera capture, and manager sign-off workflows to validate critical flock vaccinations and house maintenance.
- **Management Dashboard BFF:** Engineered edge-level route gatekeeping (proxy.ts) and resilient data adapters using Next.js 16 App Router and Zod defensive schemas, reducing API failure rates from schema drift by 35% and cutting data-loading latency by 40%.
- **Push Notification Infrastructure:** Integrated Firebase Cloud Messaging (FCM) and background service workers (firebase-messaging-sw.js) to dispatch real-time Temperature-Humidity Index (THI) heat stress alerts.
- **Architecture Documentation:** Authored the comprehensive Developer Onboarding & Architecture Guide, streamlining onboarding workflows and establishing cross-team OpenAPI integration standards.

PROFESSIONAL EXPERIENCE (CONTINUED)

Olabits Tech Solutions — Lead Full-Stack & Mobile Software Engineer **2022 – Feb 2026**

- **Ralot StockLink B2B ERP:** Architected an end-to-end B2B supply chain ecosystem consisting of an Express/Prisma/PostgreSQL API, a Next.js/Zustand vendor dashboard, and an Expo React Native mobile client with role-based access control (Retailers vs. Suppliers).
- **Olabits Estate Bot (AI SaaS):** Developed a multi-tenant real estate chatbot platform leveraging Next.js App Router, Vercel AI SDK, Google Gemini, Cheerio web scraping, and Paystack recurring subscription billing with webhook reconciliation.
- **Olabits Stores:** Built a production-ready e-commerce platform pairing a Vue 3 (Composition API) + Pinia + Vite SPA with an Express 5 and Prisma backend, executing end-to-end integration test suites with Vitest and Cypress.
- **Expense Tracker Mobile App:** Engineered an offline-first Android personal finance application using React and Capacitor; integrated @capacitor/preferences native storage, multi-currency formatting, and prepared production signed AAB builds targeting Android API 36.
- **SeaBite Express Platform:** Delivered a high-throughput transaction platform within an aggressive 4-week release window using Node.js, Express, and PostgreSQL; built automated sales reporting pipelines that saved administrative staff 10+ manual reporting hours weekly.
- **Algorithmic Trading Systems:** Developed multi-client algorithmic trading engines for MetaTrader 5 and Bybit V5 using Python (HMAC-SHA256 authenticated REST API), implementing Fernet AES credential encryption, automated risk sizing, and Telegram alert triggers.

FEATURED ENGINEERING PROJECTS

AI Job Hunter Bot — Node.js, GitHub Actions, Resend API, fast-xml-parser

- Developed an automated background pipeline running scheduled GitHub Actions cron jobs to scan remote job feeds (RemoteOK, ATS boards), executing algorithmic keyword ranking and dispatching curated opportunity digests via Resend.

Bybit Quantitative Crypto Trading Engine — Python, Bybit V5 REST API, HMAC-SHA256, SQLite

- Built a quantitative perpetual markets execution bot with multi-timeframe scoring (1D, 4H, 1H), signed REST authentication, duplicate order prevention via deterministic orderLinkId, and daily 15% drawdown circuit breaker protection.

GMT Homes Real Estate Platform — Next.js App Router, PostgreSQL, Prisma, Tailwind CSS

- Built a full-stack real estate platform featuring interactive property listing exploration, role-aware user authentication dashboards, WhatsApp-first contact actions, and secure PostgreSQL persistence.

EDUCATION & PROFESSIONAL CREDENTIALS

Software Engineering Diploma — GMT Softwares Academy **Completed (2022)**

B.Sc. Physics (Hons) — Federal University Lokoja **2016 – 2021**

Languages: English (Native / Full Professional Proficiency)
