PROFESSIONAL PROFILE

Front-end Developer and Software Engineer with experience building production-ready SaaS platforms, cross-platform mobile apps, automation systems, dashboards, and business applications. Skilled in React, Next.js, React Native (Expo), JavaScript, Type-script, Node.js, Express.js, PostgreSQL, REST API integration, and modern deployment workflows. Strong fit for roles requiring front-end delivery, product thinking, API integration, and scalable, user-focused solutions.

TECHNICAL SKILLS

- **Front-end:** React, Next.js, React Native (Expo), JavaScript, Type-script, HTML5, CSS3, Tailwind CSS
- **Back-end:** Node.js, Express.js, REST API Architecture, Server-side Integration
- **Database:** PostgreSQL, SQLite, Data Modeling, Structured Data Management
- **Mobile & Web:** Cross-platform App Development, Progressive Web Apps (PWA), Responsive UI Development
- **Tools & Deployment:** Git, GitHub, GitHub Actions, Vercel, Render, VS Code
- **Automation:** Workflow Automation, AI-assisted development, Prompt Engineering, Dashboard automation

PROFESSIONAL EXPERIENCE

Front-end Developer / Software Engineer (Remotely) - Farmitly Technologies | *February, 2026*

- Developing cross-platform mobile applications using React Native (Expo) and Type-script for market-connection solutions.
- Building scalable UI components, integrating APIs, and contributing to production-ready mobile workflows and user experience improvements.

Software Engineer (Remotely) - SeaBite Express | *January, 2026*

- Designed and deployed a sales and inventory management system used for real business transactions and operational record keeping.
- Built back-end services with Node.js, Express.js, and PostgreSQL for sales, expenses, inventory flow, and reporting.

SELECTED PROJECTS

GMT Homes Real Estate Platform - Built a polished Next.js real estate platform with property browsing, authentication, dashboards, listing submission, moderation, booking flow, PostgreSQL-backed storage, map integration, and cloud-ready uploads.

MT5 Multi-Client SaaS Trading Bot - Built an automated trading system with multi-client support, encrypted client storage, risk control, VPS-ready operation, and structured execution workflow.

AI Job Hunter Bot - Built a GitHub Actions and Resend powered automation tool that scans job boards, ranks openings, discovers recruiter emails, and sends daily reports.

Expense Tracker / Car Rental / Landing Pages - Built React, Next.js, and branded web experiences across expense tracking, service platforms, and portfolio-driven landing pages.
